Thanks, Barbara. I had the correct versions.

Attached are my comments on the SQ table inserted into the version that you sent me. I will do the same for my comments on the main body and send in a few hours.

Hey Andrew,

Here is the latest version. I tried to comment and edit to get to synthesis incorporating confidence but I'm sure there is more that could be done. I also tried to edit the hazard conclusion table at the end to illustrate our earlier comments that were ignored.

I haven't yet reconciled the literature search numbers.
